

# Industrial Parquet

## *Data Sheet*

**HØRNING Industrial Parquet** is a simple, incredibly durable solution.

The flooring has no tongues/grooves, allowing for multiple sandings.

The variations in the many small staves lend the flooring its distinctive 'colour interplay'.

### **Highlighted Features:**

- Exceptional durability for high traffic areas like schools, entrances, and lobbies
- A *Wholehearted* pledge to use the remains of the log, reducing waste in the production
- Documented sustainability credentials towards certifications such as BREEAM, DGNB, and LEED through EPDs and Eurofins

If you have any questions or need advice, please don't hesitate to contact us.

# Industrial Parquet

## Data Sheet

**HØRNING Industrial Parquet** consists of small solid wood staves that are turned on end.

The staves in fixed dimensions are put together in sheets of approx. 160 x 320 mm, assembled with tape for a quicker installation. Other dimensions than above may occur.

**HØRNING Industrial Parquet** is very robust and especially suitable for areas with high traffic. Multiple sandings of the floor may be done since the material lacks tongue and groove.

**HØRNING Industrial Parquet** is less sensitive to moisture than other floors which makes it the perfect choice for entrances, lobbies, etc.

### Dimensions & Construction

Types of Wood:	Ash, Oak, Smoked Oak
Thickness:	10/16/23 mm
Stave Width:	8-10 mm
Length:	160 mm
Sheet:	160 x 320 mm
Other types of wood are available on request.	

Moisture Content: 9% +/- 2%

### Description of Gradings

#### Unsorted:

Vibrant and natural unsorted variation, both regarding structure and colour of wood. Healthy knots, sapwood, and brown heart are allowed.

Grading depends on dimension and wood type. Wood is a natural material, variation in regards to description of grading, photographs, etc will always occur.

Samples are only examples and may never show grading in a whole batch. Variations between samples and actual orders always occur.

#### Profile

Sharp edged, without tongues/ grooves.

#### Tolerances

Our 100 years of production experience allows us in several product types to offer even lower tolerances.

Thickness:	+/- 0.3 mm
Width:	+/- 0.1 mm
Length:	+/- 0.2 mm

#### Surface

Untreated.

#### Installation Method

Fully Gluing	x
Screwing and Nailing	
Floating	

#### Underfloor Heating

Underfloor heating may be used – please see our installation guide.

#### Indoor Climate

It is important that the surface temperature never exceeds 27 degrees!

The relative humidity in the air (R.H.) must always be between 35-65% before, during, and after installation.

*Always study the installation guide from Hørning prior to installation.*

#### Fire Resistance Class

Cfl-s1 (Untreated, oak)  
Dfl-s1 (Untreated)  
Declaration of Performance (DOP) upon request.
