Length:	700-2400 mm	700-2400 mm
Gradings:	Ash comes in grading Select. Oak and Merbau comes in grading Living.	
Other dimensions and types of wood are available on request.		
Moisture Content:	8% +/- 2%	

Description of Gradings

Grades vary from wood species and dimension.

Hørning's many different plank floors are made of fresh wood, modified to the dimensions of the plank floors. In general, wide/long dimensions will show most variations, knots, fillings, etc.

Wood is a natural material, and variations compared to descriptions and photos will always exist. Samples will only show dimensions and construction and cannot show the grade. It is certain that variations will be found between small samples and the actual deliveries.

Select/Exquisit:

General uniform colour and wood structure. Variations, due to growth conditions, will always exist. Healthy knots and a few fillings of knots and minor cracks may be found. Whirls, small scratches and cross grains, sapwood, and brownheart may be found to a small extent. Additionally, this grade involves that the wider and longer the planks are, the more and bigger variations, knots, etc. will be found.

Nature/Living:

A more characteristic look with natural colours and wood structure. In principle free of open knots, cracks, pith, etc. Whirls, healthy knots, small scratches, cross grains, and silicon stains will be found depending of the wood species. Knots occur naturally in both small and big dimensions. Open knots, cracks, etc. are filled. Sapwood, brownheart and pith will be found depending of the wood species.

Rustic/Country:

A very characteristic look with natural colour variations and structures. Knots, sapwood, and brownheart is found. Open knots, cracks, and fillings may be found.

Profile

Tongue/groove on 4 sides. The profile depends on the width and comes with either sharp edges or microbevels.

Fire Resistance Class

Dfl-s1 (Untreated)
Cfl-s1 (Prefinished)
Declaration of Performance (DOP) upon request.

Surface

Delivered filled, sanded, and unfinished as standard. May be delivered with finished surface treatment with oil or mat lacquer upon request.

Installation Method

Fully Gluing	x
Screwing and Nailing	x
Floating	

Tolerances

Our 100 years of production experience allows us in several product types to offer even lower tolerances.

Thickness:	
Unfinished	+/- 1.0 mm
Prefinished	+/- 0.3 mm
Width:	+/- 1.0 mm
Length:	+/- 2.0 mm
Perpendicular:	≤ 0.2%

Underfloor Heating

Underfloor heating may be used – please see our installation guide.

Indoor Climate

It is important that the surface temperature never exceeds 27 degrees!

The relative humidity in the air (R.H.) must always be between 35-65% before, during, and after installation.

Always study the installation guide from Hørning prior to installation.

CE Certification

The product is CE marked in accordance with the European standard regarding wooden floors for indoor usage EN 14342.
